

Fully Funded Postdoctoral Position in Microbial Oceanography
Texas A&M University–Corpus Christi

The Lin Lab at Texas A&M University–Corpus Christi (TAMUCC) is seeking a highly motivated postdoctoral researcher for a fully funded two-year position in **marine microbial ecology, metagenomics, and metatranscriptomics**.

The successful candidate will be co-advised by **Dr. Yajuan Lin** (Texas A&M University–Corpus Christi, [Lin Lab](#)) and **Dr. Weiyi Tang** (University of South Florida, [Tang Lab](#)). The position is based at TAMUCC, with opportunities to spend part of the appointment at University of South Florida (St. Petersburg campus). The postdoctoral research will join a major **Trans-Atlantic research cruise** in Spring 2027, spanning from Cape Verde across the tropical Atlantic Ocean, the Caribbean Sea, and the Gulf of Mexico, and concluding in Florida.

This highly interdisciplinary project brings together microbial oceanography, chemical oceanography, and satellite remote sensing to investigate microbial processes at the basin scale. The postdoctoral researcher will collaborate closely with an interdisciplinary team of scientists and contribute to field sampling/experiments, molecular analyses, and bioinformatic investigations of marine microbial processes.

Applicants should have:

- A Ph.D. in microbiology, biological oceanography, bioinformatics, or a related field.
- Background in microbial ecology and/or molecular biology.
- Experience with metagenomic and/or metatranscriptomic data analysis and bioinformatics.
- Excellent written and verbal communication skills.

Previous seagoing experience is desirable but not required.

The preferred start date is **November 2026**, although a flexible start date can be accommodated.

To apply or request additional information, please contact **Yajuan** (yajuan.lin@tamucc.edu) and **Weiyi** (weiyitang@usf.edu). Applications will be reviewed as they are received until the position is filled.
